Preguntas del examen

ASIS-CPP

Certified Protection Professional

1. Which of the following types of ethics is the most relevant to business?

- A. Applied
- B. Descriptive
- C. Analytical
- D. Practical

Answer: A

2. Passive infrared sensors detect intruders by sensing:

- A. the contrast between the Thermal energy of an intruder's body and the energy of the surrounding area.
- B. an intruder passing through a pulsed light beam emitted by the detector.
- C. the air shift that occurs when an intruder passes through the sensor's field.
- D. the contrast between an intruder's clothing and the stationary objects the intruder passes in front of.

Answer: A

3. Monitoring new rules or legislation to determine how they affect the finances and administration of a business is an example of assessing:

- A. strategic risk
- B. regulatory risk.
- C. operational risk.
- D. reputational risk.

Answer: B

4. To be considered a trade secret, information must meet all of the following criteria EXCEPT:

- A. the owner must take steps to prevent its unauthorized disclosure.
- B. persons to whom it is disclosed must know that it is secret.
- C. it must not be identifiable-
- D. it must not be available already in the public domain.

Answer: C

5. Which of the following guidelines should organizations adopt when conducting preemployment drug screening?

- A. Providing consistent quotas
- B. Ensuring confidentiality
- C. Specifying legal consequences
- D. Maintaining flexibility

Answer: B

6.Which of the following is one step in the risk assessment process for use in protecting information?

- A. Securing physical trade secret information
- B. Providing ongoing security training information to employees
- C. Identifying information assets
- D. Confining intellectual knowledge of information

Answer: C

7.Tax laws, trade agreements, and product safety labeling are examples of what business macro-environment sector?

- A. Economic
- B. Demographic
- C. Political-legal
- D. Socio-cultural

Answer: C

8.An examination of workplace violence incidents not involving robbery reveals that perpetrators:

- A. usually have no intention of violence, but react to criticism.
- B. suddenly and impulsively "snap."
- C. progressively move through stages resulting in violence.
- D. have a history of violent behavior.

Answer: C

9.A software program that performs a useful purpose but also has a hidden destructive purpose is known as a:

- A. logic bomb.
- B. virus
- C. Trojan horse.
- D. worm.

Answer: C

10.When managing an investigative unit, the best way to obtain favorable support for budget requests is to:

- A. cut education and training expenses for the unit
- B. provide estimates of overall investigative costs.
- C. utilize investigators in roles outside of the unit.

D. demonstrate restitution and recovery benefits.

Answer: D

11. When a disciplinary action commences, supervisors should:

- A. handle matters with sensitivity.
- B. establish control.
- C. ignore individual differences.
- D. discipline only as a last resort.

Answer: A

12. Alarm sensors that utilize the Doppler effect are:

- A. infrared.
- B. photoelectric.
- C. capacitance.
- D. microwave.

Answer: D

13. An investigative agency has been storing samples of hazardous materials which were collected as evidence in a recently adjudicated case and are no longer needed. To dispose of the hazardous materials, the agency should:

- A. place the hazardous materials in an air-tight, waterproof container and place them in the regular waste bin.
- B. obtain disposition assistance from a qualified contractor who understands local regulations about hazardous waste.
- C. call the local fire department non-emergency number and request that the fire department take possession of the hazardous materials.
- D. place the hazardous materials in a metal container and ask an employee to transport them to a local waste disposal facility.

Answer: B

14. Which of the following types of lighting enables a color video surveillance camera to produce the most accurate color rendition?

- A. High-pressure sodium
- B. Mercury vapor
- C. Low-pressure sodium
- D. Metal halide

Answer: D

15. Post orders should be developed with which of the following criteria in mind?

- A. Each order is indexed
- B. Each order is detailed
- C. Each order is written in third party language
- D. Each order deals with one subject

Answer: D

16. The starting point for pre-employment screening is the:

- A. list of references.
- B. application.
- C. interview.
- D. resume.

Answer: B

17. The ISO 27001 and ISO 27002 standards are important for the information systems security (ISS) practitioner because they:

- A. ensure absolute compliance with the payment card industry data security standard (PCI DSS).
- B. represent the first acknowledged worldwide standards to identify a code of practice for the management of information technology
- C. ensure absolute compliance with the advanced encryption standard.
- D. represent the first acknowledged worldwide standards to identify a code of practice for the management of information security.

Answer: D

18. Which of the following is an essential characteristic of an effective information security system?

- A. Senior management conducts unannounced inspections.
- B. Program performance is reviewed and adjusted at regular intervals.
- C. Policy has multi-level management approval.
- D. Computers are secured to workstations.

Answer: B

19. During an interrogation, novice investigators often overlook asking the suspect:

- A. how they can prove their innocence.
- B. what they know about the offense.
- C. if they committed the offense.
- D. to provide an alibi

Answer: B

20.The two basic bomb classifications are:

- A. ignition and detonation.
- B. fragmentation and fire.
- C. heat and blast.
- D. explosive and incendiary.

Answer: B

21.When all risks have been identified and specific points established for each, what must be developed next?

- A. Countermeasures
- B. Vulnerabilities
- C. Inspection report
- D. Site security plan

Answer: A

22.In the process of conducting a security survey or security audit, meaningful factual objective work consists of measuring results against:

- A. an acceptable security standard
- B. previous audit results
- C. the security professional's knowledge.
- D. past practice.

Answer: A

23.Having received a bomb threat from a non-credible source, the security manager should immediately:

- A. fully evacuate and then search.
- B. search without evacuating.
- C. partially evacuate and then search.
- D. fully evacuate without searching.

Answer: B

24.While conducting an interview, the most important initial objective for the investigator to accomplish is to:

- A. obtain an understanding of all the facts of the case.
- B. establish a favorable rapport with the interviewee.
- C. use all applicable means to get the interviewee to release information.

D. prepare copious notes of all events detailed by the interviewee.

Answer: B

25. An employee's access to information should be based on what criteria?

- A. Their knowledge of the subject matter.
- B. Their position or management level.
- C. Their current job function and "need-to-know."
- D. Their organizational relationship to the information owner.

Answer: C

26. Losses avoided may be determined by:

- A. the net value of lost services billed minus the average billing rate.
- B. dividing total overhead costs by present cost of capital.
- C. the difference between losses estimated without the security program and those with the program.
- D. multiplying loss frequency by the cost of events.

Answer: C

27. The first step in the "general security risk assessment flow chart" is to:

- A. identify assets.
- B. specify loss events.
- C. identify impact of events.
- D. conduct cost/benefit analysis.

Answer: A

28. Cost avoidance can best be described as the:

- A. amount of losses that likely would have occurred without the security program.
- B. cost of the loss-prevention program.
- C. amount of losses that likely would have occurred without a disaster recovery plan.
- D. savings achieved through outsourcing.

Answer: A

29. The best way to reduce internal theft is to:

- A. conduct extensive employee programs.
- B. conduct pre-employment tests
- C. hire employees with integrity.
- D. implement strict disciplinary procedures

Answer: C

30. A security officer must testify in a civil lawsuit involving the alleged wrongful termination of a former employee for violation of company rules.

To best prepare himself for the trial, the security officer should first;

- A. discuss the case with other security officers.
- B. review his notes and reports on the incident.
- C. review his testimony with the employee's attorney.
- D. sign out the evidence in order to look it over.

Answer: B

31. A risk manager may choose to use an insurance broker because a broker:

- A. has more knowledge about insurance than the risk manager.
- B. represents a mutual insurance group.
- C. represents more than one company and can suggest the best insurance option.
- D. will best represent the insurance company's interests regarding policy coverages and limits.

Answer: C

32. Responsibility for shutdown supervision should be assigned by the disaster plan to a facility's engineering service.

The actual shutdown should be accomplished by:

- A. a maintenance worker.
- B. senior management.
- C. the plant manager
- D. employees familiar with the process.

Answer: C

33. An indication of deception by a suspect during the interviewing process would be:

- A. giving direct, spontaneous responses to questions.
- B. asking clarifying questions
- C. casually changing position.
- D. engaging in a variety of tension-relieving gestures.

Answer: D

34. In the event of an earthquake, all of the following are recommended EXCEPT

- A. turning off natural gas sources.
- B. extinguishing all light sources.
- C. remaining clear of all electrical sources.

D. seeking inside shelter immediately

Answer: B

35.The two key elements in any contingency plan are:

- A. a threat procedure and a safety procedure.
- B. a procedure for reporting and a procedure for training.
- C. what is to be done and who is to do it.
- D. local assistance and response.

Answer: C

36.After an information loss, which of the following three steps should be taken by an organization?

- A. Identify source of the leak, implement the business continuity plan, update security procedures
- B. Contact law enforcement, preserve all evidence, ensure the investigation is not compromised
- C. Conduct an investigation, conduct a damage assessment, implement the recovery plan
- D. Suspend access to the perpetrator, conduct an inventory of proprietary information, document the investigation

Answer: C

37.The trend for the future in private security is toward:

- A. hybrid systems with proprietary guard forces and contract supervision.
- B. primarily contract guard forces and supervision.
- C. hybrid systems with proprietary supervision and contract guards.
- D. primarily proprietary guard forces and supervision.

Answer: C

38.An affiliation of organizations agreeing to assist each other during an emergency by providing materials, equipment, and personnel is known as a/an:

- A. incident response association
- B. crisis support organization.
- C. business support association.
- D. mutual aid association.

Answer: D

39.Protection-in-depth is the strategy of:

-
- A. forming layers of protection around an asset.
 - B. creating barriers that deter, detect, and delay access to an asset
 - C. assigning security precautions to all assets.
 - D. applying security precautions based on value.

Answer: A

40. An erroneous test result that indicates the presence of a drug that is absent is known as a:

- A. presumed positive
- B. false positive.
- C. false negative.
- D. presumed impairment.

Answer: B

41. Who shall establish, document, provide resources, and demonstrate commitment to a business continuity management policy within the defined scope of the business continuity management system?

- A. Top management
- B. Security manager
- C. Human resource manager
- D. Chief financial officer

Answer: A

42. Words, symbols, logos, designs, or slogans that identify products or services are protected by a:

- A. copyright.
- B. trade secret.
- C. patent.
- D. trademark.

Answer: D

43. The relationship between law enforcement and private security is best when it is:

- A. reciprocal.
- B. cooperative.
- C. interchangeable.
- D. parallel.

Answer: B

Elija las preguntas y respuestas del examen ASIS CPP para el título en el examen

44. In addition to utilizing state-of-the-art locking devices, electronic surveillance, and spaces designed to maximize effective use by intended users, what other CPTED strategies can be used to enhance a security system?

- A. A focus on policies and activities that encourage observation, reporting, and intervention
- B. The implementation of access control and identification badge programs.
- C. The construction of a perimeter fencing and barriers that deters potential intrusion.
- D. The implementation of vehicular bollards at the dock entrance.

Answer: A

45. To determine a return on an investment, it would be best to use which of the following?

- A. Overhead as a % of profit
- B. Increased profits as a % of sales
- C. Profits as a % of capital investment
- D. Potential losses as a % of sales

Answer: C

46. The true art of delegation includes:

- A. giving responsibility with commensurate authority and holding the employee fully accountable for use of that authority.
- B. giving responsibility with commensurate authority and holding the employee's supervisor fully accountable for use of that authority.
- C. giving accountability with flexibility and then retaining responsibility for ensuring that the authority is used.
- D. giving accountability with authority and holding the employee responsible for use of that authority.

Answer: A

47. When preparing risk analysis reports, criticality is defined as the:

- A. impact of a loss as measured in dollars.
- B. possibility of a loss event occurring.
- C. need to decrease emergency response time.
- D. risks that can be assumed or transferred.

Answer: A

48. A cost-benefit analysis is essential to:

- A. balance the security budget.

-
- B. select the proper risk treatment.
 - C. predict long-Term financial concerns.
 - D. select the most affordable security solution.

Answer: B

49. With special provisions and approvals from the authority having jurisdiction, it is acceptable for "delayed exit" devices to have which of the following maximum ranges of locking time?

- A. 1-5 seconds
- B. 5-15 seconds
- C. 15-30 seconds
- D. 30-45 seconds

Answer: C

50. Which of the following distinguishes embezzlement from other kinds of theft of corporate property or funds?

- A. Embezzlement can be detected only through an audit or accounting discrepancy.
- B. In embezzlement, the employee breaches a trust by stealing assets entrusted to him/her.
- C. Embezzlement is a "white collar" crime most often perpetrated by senior managers.
- D. It is not necessary to prove criminal intent in an embezzlement case.

Answer: B

51. According to the Substance Abuse and Mental Health Services Administration study of 2000, the vast majority of illicit drug users are:

- A. unemployed
- B. incarcerated
- C. employed.
- D. on parole

Answer: C

52. The most important written instructions for a security force are known as:

- A. policies.
- B. procedures
- C. post orders.
- D. operational orders.

Answer: C

53. Which of the following is the proper term for an organization's financial commitment?

- A. Costs
- B. Debt
- C. Liabilities
- D. Assets

Answer: B

54. The term that best describes the ultimate goal of a supervisor's job is:

- A. performance of the unit.
- B. effective staffing.
- C. goal-setting for the unit.
- D. timely decision-making.

Answer: A

55. The criterion that serves as the basis for rating fire-resistant document containers exposed to heat for varying periods of time is the:

- A. percentage of internal water absorption from exposure to a simulated fire hose.
- B. percentage of internal documents that are charred.
- C. maximum allowable interior temperature.
- D. rate of internal temperature rise.

Answer: C

56. Emergency shutdown procedures are important because:

- A. damaged equipment is costly to replace.
- B. personnel could be at risk inside the facility
- C. employee safety is the highest priority.
- D. they greatly reduce the hazards and length of the emergency condition.

Answer: C

57. Which of the following is a major problem associated with drug use in the workplace?

- A. Attendance
- B. Increased arrest rate
- C. Policy control
- D. Drug distribution

Answer: A

58.The term "hot site" refers to a:

- A. location that has sustained a major amount of radiation.
- B. location where stolen computer components are stored prior to resale.
- C. site where the HVAC system failed, making computer operations unfeasible.
- D. standby alternate site with duplicate hardware and operating software.

Answer: D

59.Which type of motion detection sensor can penetrate unshielded walls and respond to motion occurring outside the protected premises?

- A. Microwave
- B. Volumetric
- C. Ultrasonic
- D. Infrared

Answer: A

60.A person who is excessively active, excited, and talkative, has dilated pupils, and goes for long periods without eating or sleeping may be under the influence of which of the following drugs?

- A. Marijuana
- B. Amphetamines
- C. Narcotics
- D. Alcohol

Answer: B

61.While conducting an executive protection risk assessment, the executive protection specialist should focus on what two areas in order to rate the risks?

- A. Threat transfer and threat spreading
- B. Threat avoidance and threat mitigation
- C. Threat analysis and threat likelihood
- D. Threat control and threat hazards

Answer: C

62.Performing a vulnerability analysis, selecting and installing countermeasures, and testing the operating program are three general steps in the:

- A. conducting of a security survey.
- B. design of a fully integrated security system.
- C. selection of a comprehensive security system.
- D. systems approach to an asset protection program.

Answer: D

63. Which of the following terms best describes when a person's tissue cells have adjusted to the presence of a drug?

- A. Habituation
- B. Physical addiction
- C. Tolerance
- D. Dependence

Answer: C

64. When evaluating a security project bid, a Certified Protection Professional should:

- A. evaluate corporate supplier risk.
- B. ensure conformance to requirements.
- C. make a selection as quickly as possible.
- D. select the provider offering the lowest cost.

Answer: B

65. A newly hired corporate investigator is conducting interviews to collect information and determine who is responsible for the loss of a missing company laptop from a desk in the shipping and receiving department.

At what point must the investigator start observing non-verbal responses?

- A. The investigator must start observing non-verbal responses when the investigator moves the interview into the accusatory stage and the interview becomes an interrogation.
- B. Observation of non-verbal response are only important if the investigator must re-interview someone to have a comparative in the person posture between the two interviews
- C. The investigator must only observe nonverbal responses if the investigator finds the person to be lying and become defensive in the responses to the investigator's questions.
- D. The investigator must observe non-verbal from the onset of the interview process and continue to observe the interviewee throughout the interview process.

Answer: D

66. What is the basic objective of Crime Prevention Through Environmental Design (CPTED)?

- A. Ensuring budding code compatibility through architectural design
- B. Preventing crime through physical and construction planning
- C. Achieving defensible space in architectural conformity

D. Improving the accuracy of crime statistics

Answer: B

67. An important element of an emergency response plan includes:

- A. recovery operation procedures.
- B. utilizing an incident management system.
- C. designating a hot site.
- D. shift relief procedure for response personnel.

Answer: A

68. During restoration of electrical power after a brief power outage, which of the following types of lighting takes the least time to attain full brilliance?

- A. Incandescent
- B. Metal halide
- C. High-pressure sodium vapor
- D. Mercury vapor

Answer: A

69. Crime Prevention Through Environmental Design is a set of management tools targeting:

- A. vault, safe, and intrusion testing.
- B. access control, CCTV and burglar and fire alarm systems.
- C. fencing, lighting, bollards, and gates.
- D. places, behavior, and the design and use of space.

Answer: D

70. Security planning relating to threat assessment will result in the determination of the:

- A. likelihood of a terrorist attack.
- B. degree of security required in all areas of the company.
- C. number of personnel required.
- D. capital expense requirements for the annual budget.

Answer: B

71. Which of the following surveys should be conducted to determine the effectiveness of risk controls and justify their placement within the security budget?

- A. Probability analysis
- B. Cost-benefit analysis

-
- C. Cyber risk assessment
 - D. Vulnerability assessment

Answer: B

72. In order to measure an applicant's compatibility for a certain position, it is necessary to initiate a/an:

- A. intelligence/aptitude test.
- B. pre-employment/psychological test.
- C. medical/physical test.
- D. personality/integrity test.

Answer: B

73. In a theft of proprietary information case, which of the following steps is most important to the security manager?

- A. Sensitive products were not displayed at trade shows.
- B. Active steps were taken to protect the information.
- C. Every employee was trained to classify the information.
- D. The information was patented, trademarked, or copyrighted

Answer: B

74. The two reasons for testing the security operating program are:

- A. identification of residual risks or deficiencies and identification of system changes needed to accommodate organizational changes.
- B. identification of new system requirements and resource justification.
- C. determination of further changes needed in the software and identification of operational problems.
- D. training of personnel and development of new identification procedures as required.

Answer: C

75. A security organization that utilizes a departmental structure may limit opportunities for:

- A. productivity.
- B. individual growth.
- C. team growth and a strong work ethic.
- D. cross-functional cooperation and coordination.

Answer: D

76.Which of the following should be used to establish annual loss expectancy?

- A. Impact and frequency
- B. Vulnerability and risk
- C. Statistics and logic
- D. Probability and causation

Answer: A

77.Which type of sensor creates an electrical field around metallic objects that signals an alarm when activated?

- A. Ultrasonic motion
- B. Grid wire electrolytic
- C. Capacitance
- D. Balance magnetic

Answer: C

78.The first task of a security practitioner in a security risk assessment is to develop an understanding of the:

- A. vulnerabilities.
- B. organization.
- C. impact of events.
- D. cost/benefit analysis.

Answer: B

79.If an employer does not utilize testing for drug impairment it should:

- A. discourage drug use during working hours.
- B. enact a policy prohibiting detectable illegal drugs.
- C. report suspected impairment to law enforcement.
- D. offer counseling through employee assistance programs

Answer: B

80.The most important skill required of an effective security manager is:

- A. organization.
- B. employee development.
- C. delegation.
- D. communication.

Answer: D

81.Which of the following best represents a secure product management system?

-
- A. Receiving, shipping, and warehousing as separate departments
 - B. Receiving and warehousing as one department, and shipping as a separate department
 - C. Receiving and shipping as one department, and warehousing as a separate department
 - D. Receiving, shipping, and warehousing as one department

Answer: C

82. Knowing where security fits into a company's budget is critical to the manager successfully accessing financial resources.

Which of the following statements best describes a security department's impact on the bottom line?

- A. The security department's costs must be minimized to reduce the expense side of the corporate ledger
- B. The security department is an investment with a predictable rate of return.
- C. The security department's expense requests must be supported by a cost-benefit analysis.
- D. The security department helps the profit margin by reducing or preventing losses of company assets.

Answer: D

83. To motivate employees, supervisors should:

- A. get to know the employees.
- B. hold on to good employees.
- C. display operational prowess.
- D. maintain high personal standards.

Answer: A

84. Assessing the potential consequences of a disruption within a functions area is known as:

- A. business continuity planning.
- B. business impact analysis.
- C. security survey.
- D. consequence analysis.

Answer: B

85. An employee has been accused of making threats to co-workers. As the security manager, you have been asked to deal with the situation.

Your best response would be to:

-
- A. investigate the threat, and request that human resources work with the employee
 - B. investigate the threat, and ask the employee's supervisor to watch for signs of aggressive behavior.
 - C. check the employee's locker and car for a weapon.
 - D. investigate the threat, and terminate the employee immediately.

Answer: A

86. During an investigation of embezzlement, there is a need to review the accounts payable ledger.

This accounting record should contain the;

- A. names and addresses of company suppliers.
- B. amounts paid to company suppliers and vendors, together with dates of payment.
- C. amount, kinds, and shipment dates of finished goods sent to customers.
- D. company financial operating results for the most recent fiscal period.

Answer: B

87. Which of the following fields involves defenses against the interception of data communications from microphones, transmitters, or wiretaps?

- A. Technical security
- B. Emanation security
- C. Line security
- D. Transmission security

Answer: B

88. Opium, morphine, and codeine are all classified as:

- A. depressants.
- B. narcotics.
- C. stimulants.
- D. hallucinogens.

Answer: B

89. ROI (Return on Investment) can be best measured by:

- A. an increase in insurance payments.
- B. an increase in manpower.
- C. the reduction of manpower
- D. higher liability.

Answer: C

90. A fidelity bond is a type of insurance that will compensate for company losses from:

- A. employee negligence.
- B. data loss.
- C. employee dishonesty.
- D. natural disasters.

Answer: C
